- Towns and Villages
- U.S. Census Boundaries
- County Boundaries
- Missouri River Basin
- Arkansas River Basin
- Mississippi River Basin

Water right information on this map represents conditions as of March 31, 2002 and was obtained from the Kansas State Geologist's Office. The data is intended to provide a general picture of water use in Kansas. It is not a comprehensive inventory of all water rights in the state. The data is derived from a variety of sources, including government records, surveys, and voluntary reporting by water users. The information is subject to change and it is recommended that users consult with local authorities for the most accurate data.
