The 2014 Water Level data were published on the Web and not in paper form. Both the current year's measurements and historical water-level data are archived and maintained on the KGS website in the WIZARD database at [www.kgs.ku.edu/Magellan/WaterLevels/index.html](http://www.kgs.ku.edu/Magellan/WaterLevels/index.html). The Township-Range-Section identifier and the depth to water for each well measured in 2014 are provided in tabular form as part of this report and can be found online under the heading "2014 Reports" at [www.kgs.ku.edu/Hydro/Levels/index.html](http://www.kgs.ku.edu/Hydro/Levels/index.html).

## 2014 Water Level Data Acquisition Statistics

### Summary

The field-measurement phase of the 2014 annual cooperative water-level measurement program was successfully completed by both the Kansas Geological Survey (KGS) and the Division of Water Resources (DWR), Kansas Department of Agriculture, prior to March 1, 2014. The annual program is designed to regionally sample the High Plains aquifer in Kansas so trends can be established and evaluated for effective incorporation into water-resource management strategies. Water levels were recorded in 97.9% of the 1,398 network wells in 2014. The KGS measured 501 wells and the three DWR offices (Garden City, Stafford, and Stockton) measured 897 wells. Data acquisition by KGS staff was completed in January.

Based on spatial analysis of the 2013 annual network-well distribution, 22 locations were identified that required additional water-level data to permit continuous and uniform sampling of the High Plains aquifer. Wells were identified in these locations with sufficient construction and historical information and landowner cooperation to attempt a water-level measurement. All 22 wells were measured. These 22 provisional wells were incorporated into the network for 2015 and will be measured in all future measurement campaigns unless the wells become unreliable or are plugged. Yearly geostatistical studies will define undersampled areas and will be used to select optimum locations for replacement wells to eliminate extraneous holes in the hexagonal network.

<b>January 2014 Acquisition</b>	<b>KGS</b>	<b>DWR</b>	<b>Total</b>

## Appendices

The two appendices to this report are summary tables.

Appendix A Contains a summary of information for all wells measured by KGS. This appendix includes only county, well legal description (ID), and 2014 depth of water below ground surface (BGS). Quality Assurance measurements (QA) and Provisional wells (PROV) are also identified.

Appendix B Contains a summary of information for all wells measured by DWR. This appendix includes only county, well legal description (ID), and 2014 depth of water below ground surface (BGS). Quality Assurance measurements (QA) and Provisional wells (PROV) are also identified.

Both the current year's measurements and historical water-level data are archived and maintained at the KGS in a centralized database (WIZARD) that can be accessed at the KGS website at [www.kgs.ku.edu/Magellan/WaterLevels/index.html](http://www.kgs.ku.edu/Magellan/WaterLevels/index.html). The Township-Range-Section identifier and the water level for each well measured are also provided in tabular form as part of this report, which can be found online at [www.kgs.ku.edu/Hydro/Levels/index.html](http://www.kgs.ku.edu/Hydro/Levels/index.html) under the heading "2014 Reports."
