Kansas Geological Survey – Wichita Sample Preservation Activities 2016

- Oil and gas operators provided the Library with samples from nearly 645 oil, gas or injection wells.
- Samples from 634 wells were preserved at an average rate of nearly 900 sample feet per hour for a total of 660 processing hours.
- 48,750 sample envelopes and 1,172 sample boxes were used to preserve well samples.
- Samples from 14 wells were discarded because the samples were not geologically significant to the oil or gas operator and the Library.
- Staff preserved about 0.6 million sample feet, the equivalent to the flight distance from Wichita, Kansas to Independence, Kansas.
- Utilized 1,163 hours to restore samples for 3,300 wells and resolved 12,945 sample preservation issues, including the recovery of samples for 292 wells.
