Petroleum companies provided the Survey with geologic samples from 641 oil and gas wells.

Samples from 600 wells were preserved at an average rate of nearly 918 sample feet per hour for a total of 862 processing hours.

61,250 sample envelopes and 3,076 sample boxes were used to preserve and restore well samples.

Samples from 17 wells were not geologically significant to the oil or gas operator and the sample collection and were discarded.

Staff preserved almost 0.81 million sample feet, the equivalent to the flight distance from Wichita, Kansas to Oklahoma City, Oklahoma.

Funded 1,797 hours to restore samples for 2,937 wells and resolved 16,942 sample preservation issues, including the recovery of missing samples for 537 wells.
