Subject: BROTHERS 10-1
C SW/4
Sec. 1-21s-7w
Rice County, Kansas

The following information was derived from the open hole logs run on the BROTHERS 10-1 and should be used in conjunction with the Geologist's log on this well. This report covers from total depth to the top of the Lansing-Kansas City zones.

KINDERHOOK—-The Kinderhook is tight and had no shows. No recommendation. 3590

MISSISSIPPI—-The Mississippi section on the Brothers 10-1 has much better porosity than the Brothers 8-1 and 7-1. There appears to be a reworked section from 3471 to 3488, but the shale content appears normal and should not interfere with production. The best part of the zone is from 3474 to 3482. There are other good breaks at 3488 to 3492; 3495 to 3496.

The first water appears to be at 3509 to 3512 which checks 55% salt water. From this point to bottom all checks wet.

CONGLOMERATE—-The Conglomerate checks either too tight or too wet to be of any commercial value in this well.

MARMATON—-None of the zones in the Marmaton appear to have enough porosity to produce.

LANSING-K.C.—-The following zones in the Lansing-Kansas City check as follows:
3181-3193  46% salt water
This zone has an average porosity of 17% on top to 9% at 3190. This zone should be tested before the well is abandoned.
3104-3106  45% salt water
This zone could be chalky.

The rest of the zones in the Lansing-Kansas City are either wet, oxidized or too tight to produce.

Respectfully submitted,

[Signature]

Charles O. Ohl

NOTICE OF RECEIPT OF WELL PLUGGING APPLICATION (CP-1)

Bear Petroleum, Inc.
PO Box 438
Haysville, KS 67060

August 04, 2004

Re: BROTHERS #10-1
API 15-159-22044-00-00
SW 1-21S-7W, 1320 FSL 1320 FWL
RICE COUNTY, KANSAS

Dear Operator:

This letter is to notify you that the Conservation Division is in receipt of your plugging proposal, form CP-1, for the above-captioned well.

Your CP-1 has been reviewed by the Conservation Division central office for completeness and to verify license numbers. The plugging proposal will now be forwarded to the district office listed below for review of your proposed method of plugging.

Please contact the district office for approval of your proposed plugging method at least five (5) days before plugging the well, pursuant to K.A.R. 82-3-113 (b). If a workover pit will be used during the plugging of the well it must be permitted. A CDP-1 form must be filed and approved prior to the use of the pit.

The Conservation Division's review of form CP-1, either in the central or district office, does not include an inquiry into well ownership or the filing operator's legal right to plug the well.

This notice in no way constitutes authorization to plug the above-captioned well by persons not having legal rights of ownership or interest in the well. This notice is void after ninety (90) days from the above date.

Sincerely

David P. Williams
Production Supervisor

District: #2
