1. Notify the appropriate district office prior to spudding of well.

2. A copy of the approved notice of intent to drill shall be posted on each drilling rig.

3. The minimum amount of surface pipe as specified below shall be set by circulating cement to the toe in all cases surface pipe shall be set through all uncontaminated materials plus a minimum of 30 ft into the underlying formation:

4. If the well is dry type, an agreement between the operator and the district office on plug length and placement is necessary prior to spudding:

5. The appropriate district office will be notified before well is either plugged or producer casing is cemented in;

6. If an ALTERNATE V COMPLETION, production well shall be cemented in below the bottom of the casing. When casing is set within 120 days of spudding.

7. Pursuant to A B - Eastern Kansas surface casing order 133,891-C, which applies to the KCC District 3 area, alternate II cementing must be completed within 30 days of the well being drilled. If all cases, NOTIFY district office prior to any cementing.

I hereby certify that the statements made herein are true and to the best of my knowledge and belief.
