Describe in detail the manner in which the well is plugged, indicating where the mud fluid was placed and the method or methods used in introducing it into the hole. If cement or other plugs were used, state the character of same depth placed from (bottom), to (top) for each plug set.

Hook onto 5 1/2" casing and bullhead 50 sacks of 40-60 Pozmix cement at 13.5# and 300# cottonseed hulls to load perfs. Then spoffed 45 barrels of 6% gelled water from top of perfs to 700' from surface. Pump cement plug from 700' to surface with 90 sacks of 40-60 Poz @ 13.5# cement. Cement Fell. Had NLS wireline tag cement at 1837'. Shut down and ordered more cement for a.m. Ran another 26 barrels of 6% gelled spacer from 1837' to 700' from surface then set 75 sacks of 40-60 Poz from 700' to surface. Cut wellhead off 6' below ground and backfill.

Name of Plugging Contractor: Halliburton
License #: 3287

Name of Party Responsible for Plugging Fees: Kansas Natural Gas Operating, Inc.

State of Kansas, ss.
Steve M. Lehning @ Kansas Natural Gas Operating, Inc. (Employee of Operator) or (Operator) on above-described well, being first duly sworn on oath, says: That I have knowledge of the facts statements, and matters herein contained, and the log of the above-described well is as filed, and the same are true and correct, so help me God.
