WELL PLUGGING RECORD

Thomas County, Sec. 22, Twp. 58, Rge. 35 (W) Location as "NE/CNW/S/W" or from lines 1/2 SW 51 NW
Lease Owner: General Crude Oil Company
Lease Name: F. W. Williams Well No. 1
Office Address: 311 Commerce Building, Abilene, Texas
Character of Well (completed as Oil, Gas or Dry Hole) Dry Hole
Date well completed: September 24.
19.98
Application for plugging filed: September 9-22.
19.98
19.98
Plugging commenced: September 24.
19.98
Plugging completed: September 24.
19.98
Reason for abandonment of well or producing formation: Wall was nonproductive of oil or gas.

If a producing well is abandoned, date of last production: None
Was permission obtained from the Conservation Division or its agents before plugging was commenced? Yes – Mr. A. O. Fabriustis in Hill City, Kansas

Name of Conservation Agent who supervised plugging of this well: Mr. A. O. Fabriustis
Producing formation: None
Depth to top: __
Bottom: __
Total Depth of Well 5301
Feet

Show depth and thickness of all water, oil and gas formations.

Describe in detail the manner in which the well was plugged, indicating where the mud fluid was placed and the method or methods used in introducing it into the hole. If cement or other plugs were used, state the character of same and depth placed, from _______ feet to _______ feet for each plug set.

Heavy drilling mud was pumped through the drill pipe from 5301 to 600 feet, while the open-ended drill pipe was suspended at 600 feet, a 20 sack cement plug was mixed and pumped by Sun Cementing Company through the drill pipe and then the drill pipe was pulled from the hole, leaving the cement plug from 540 to 600 feet. After the pipe was pulled from the hole, a wood plug was placed in the 8-5/8th surface pipe and pushed to 375 feet by re-running the open-ended drill pipe. Another 20 sacks of cement was mixed and pumped by Sun Cementing Company through the drill pipe. The drill pipe was then pulled from the hole and the cement plug was from 31 to 375 feet. Another wood plug was pushed to 60 feet and 10 sacks of cement was mixed and pumped by Sun Cementing Company through the drill pipe. This plug was extended from 0 to 60 feet. A steel plate was then welded over the surface pipe which was at the bottom of a cellar 6 feet deep.
