Describe in detail the manner in which the well is plugged, indicating where the mud fluid was placed and the method or methods used in introducing it into the hole. If cement or other plugs were used, state the character of same depth placed from (bottom), to (top) for each plug set.

After plugging application was filed, it was discovered that a cast iron bridge plug had been set at 2280' and covering old perfs. New perfs were at 1773' - 1877'. Ran tubing to 2280' and tagged cast iron bridge plug. Pulled tubing to 2271' and loaded hole with 15 bbls of gelled water. Pumped 25 sx of Class A cement, 1 sx of cottonseed hulls and filled hole from 1924' to 1707' at 47' below bottom perfs and 66' above top perf. Pulled tubing to 312', loaded hole and circulated to surface with 40 sx of Class A cement.

Name of Plugging Contractor: Hurricane Well Service, Inc. License #: 32006

Address: PO Box 782228 Wichita KS 67278-2228

Name of Party Responsible for Plugging Fees: Hurricane Well Service, Inc.

State of Kansas County, Sedgwick
