Davis/Giger GU B-1

Tecumseh (752-756 ft)

- No gas effect, separation between density porosity and BVW
- Increasing Sw and BVW with depth. Upper sand Sw < 80% and BVW < 0.16.
- Some chance of gas in transition. No show during drilling.
Davis/Giger GU B-1

- Georeport indicate sand without gas show
Davis/Giger GU B-1
Severy (579-586 ft)
• Suspect coal to overly the sand
• Little separation between density porosity and BVW
• Sw +90%
• Wet sand
