Dear Mr. Reiss,

I received your request for review of the city of Windom lagoon facility improvements. The materials sent to me did not include a technical description of what will be done. The soils in the area are a Crete silt loams with a moderate to slow permeability and of loess origin. Assuming that currently there are no water quality problems related to the present treatment site I would assume that the described improvements should not result in future problems.

The comments made in this letter are based on the limited information provided to me and on the limited information I was able to access at my office.

Sincerely,

Margaret A. Townsend
Hydrogeologist

RE: City of Windom, Kansas
Wastewater Treatment System Improvements
KWPCRF Project No. C20-0906-03

Dear Director:

The City of Windom has applied to Kansas Department of Health & Environment State Revolving Loan Fund for financial assistance in the amount of \$67,500 for the construction of the above project. The City plans to also submit an application to the Kansas Department of Commerce Small Cities Program in the Water/Wastewater Category for the balance of the funding for \$67,500. As part of the application process, we are contacting your agency regarding any comments or concerns on the above referenced project.

The proposed project will consist of the replacement of the existing obsolete lift station, replacement of force main and structures in the lagoons as well as existing pond piping. Disturbed areas will be seeded and mulched upon project completion.

For your information, we have enclosed a copy of the USGS Map depicting the wastewater treatment plant site. The proposed project lies in Section 30, T19S, R5W, McPherson County, Kansas.

Please notify our office in writing of any special permits or conditions that may apply to this project. All work will be completed on either existing right-of-way or on private easements. No individuals will be displaced due to the proposed work. For your convenience, we have enclosed a transmittal form for your use in responding to this project.

We would appreciate receiving your comments by July 17, 2005. If you should have any questions regarding this project, please feel free to contact our office.

Sincerely,

REISS & GOODNESS ENGINEERS

A. E. Reiss, P. E.
