Planning and Development Consultant
Southeast Kansas Regional Planning Commission
P.O. Box 664
Chanute, KS 66720-0664

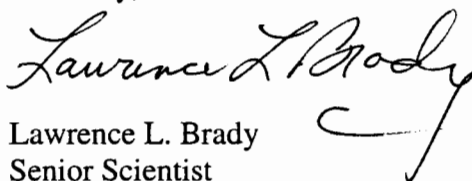

Dear Ms. Galemore:

I received your inquiry to the Kansas Geological Survey seeking input on "Environmental Assessment Comments" for improvements to the water lines for the City of Buffalo, Kansas. The project consists of a number of upgrades to the water line system as shown on the map attached with your letter. This includes upgrade of approximately 4,800 linear feet of water line, approximately 50 gate valves, and 5 fire hydrants.

It is my understanding that this review is necessary for the City of Buffalo to be considered for a grant for the sewer improvements from the Kansas Department of Commerce Small Cities Community Development Block Grant Program. I do not recognize any specific problems with your request based on the information you have provided. Therefore, the Kansas Geological Survey provides the necessary clearance from our agency for your project and I have signed the form requesting environmental assessment comments.

The above discussion represents our best assessment based on the information that the Kansas Geological Survey has about this locality and/or proposed project at the time of this writing. Other geologic conditions, not discussed herein, or for which the Kansas Geological Survey has no knowledge, may affect the viability or safe operation of this facility or property. The information provided in this letter is from regional or countywide studies and should not be used as a substitute for detailed site characterization by a licensed geologist or engineer. It is the responsibility of the applicant to provide any required site characterizations.

Sincerely,

Lawrence L. Brady
Senior Scientist
