RE: Street Renovation, Arma, KS
Community Development Block Grant Application

Dear Ms. Erbe,

The Kansas Geological Survey (KGS) has received Southeast Kansas Regional Planning Commission's (Commission) April 4, 2007 request for environmental assessment comments. The comment request is part of the grant application process for the Community Development Block Grant. The grant will finance the applicant, the City of Arma, to rehabilitate several city streets in Arma, KS (site). The project consists of pavement milling, overlay, and widening of several existing city streets.

A review of regional geologic information along with the project summary and topographic map provided by the Commission indicates that there are no unduly adverse geologic conditions that should affect this project. For the purposes of the grant application, clearance of the project should be granted. A completed request for environmental comments form is enclosed.

This letter is an assessment based on the regional geologic conditions available at the KGS at the time of writing and cannot be used in substitute of a detailed site characterization. Other geologic conditions, not discussed herein, or for which the KGS has no knowledge, may affect the viability or safe operation of this facility or property. It is the responsibility of the applicant to provide any necessary characterization, geotechnical or environmental testing, or design by a licensed professional geologist or engineer to complete the project.

Sandy Erbe
