RE: Housing Rehabilitation, Caney, KS
Home Investment Partnerships Program Grant Application

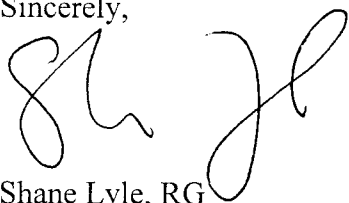

Dear Ms. Voorhies,

The Kansas Geological Survey (KGS) has received Southeast Kansas Regional Planning Commission's (Commission) March 01, 2007 request for environmental assessment comments. The comment request is part of the grant application process for the Home Investment Partnerships Program. The grant will finance the applicant, the City of Caney, to rehabilitate approximately 6 residential structures within Caney, KS (site). The individual structures are not yet identified. After the structures are selected, an environmental review will be completed for each structure.

A review of regional geologic information along with the project summary and topographic map provided by the Commission indicates that there are no unduly adverse geologic conditions that should affect this project. Environmental factors that could affect this project will likely be more site-specific in nature or dependent on the structure (e.g., asbestos, lead paint, USTs, etc.). Site-specific factors should be considered in the environmental review after the structures are identified. However for the purposes of the grant application, clearance of the project should be granted. A completed request for environmental comments form is enclosed.

This letter is an assessment based on the regional geologic conditions available at the KGS at the time of writing and cannot be used in substitute of a detailed site characterization. Other geologic conditions, not discussed herein, or for which the KGS has no knowledge, may affect the viability or safe operation of this facility or property. It is the responsibility of the applicant to provide any necessary characterization, geotechnical or environmental testing, or design by a licensed professional geologist or engineer to complete the project.

Sincerely,

A handwritten signature in black ink, appearing to read 'Shane Lyle', with a stylized flourish at the end.

Shane Lyle, RG
Geology Extension Coordinator
