Dodge City, KS 67801

Dear Ms. Trent,

I was asked to do an environmental review for the city of Sawyer wastewater treatment facility upgrade. The soils in the area are predominantly clay loams which should be sufficient for prevention of leakage if compacted or lined with bentonite if not too much is removed during excavation. Limited details of the project were provided to me. I feel that the project should move forward provided that the soil permeability issues are addressed by the engineering firm involved.

The above comments are based on regional geologic conditions and limited information available to the KGS at the time of writing and cannot be used in substitute for a detailed site characterization. Other geologic conditions, not discussed here, or for which the KGS has no knowledge, may affect the viability or safe operation of this facility or property. Geotechnical engineering and design are outside the purview of the KGS. It is the responsibility of the applicant to produce any detailed site characterizations, geotechnical or environmental testing, or design by a licensed professional geologist or engineer to complete the project.

Sincerely,

Margaret A. Townsend  
Hydrogeologist  
Geohydrology Section

## AGENCY REVIEW TRANSMITTAL FORM

COMMENT BY: August 20, 2007

To Whom It May Concern:

The City of Sawyer, Pratt County, Kansas has been awarded a Community Development Block Grant, #07-PF-726, for sewer system improvements. An environmental study was conducted for this project in August 2005. The scope of work for this project has changed therefore a new environmental study is being conducted. (Please see Project Abstract attached.)

All interested agencies, groups and persons are invited to submit written comments to our office. Such written comments should be received at Great Plains Development, Inc., P.O. Box 1116, Dodge City, Kansas 67801, no later than August 20, 2007.

Sincerely,

Faye Trent  
Grant Administrator
