RE: Housing Rehabilitation, Coffey County, KS
Rural Development Housing Preservation Grant Application

Dear Mr. Lightle,

The Kansas Geological Survey (KGS) has received Coffey County Housing Authority May 30, 2007, request for comment on a Rural Development Housing Preservation Grant application. Project details were not provided. A subsequent inquiry to the Coffey County Housing Authority by KGS staff indicates that the grant will finance a house rehabilitation project in Coffey County.

Because the project involves existing structures, environmental factors that could affect this project will likely be more site-specific in nature or dependent on the structure (e.g., asbestos, lead paint, USTs, etc.). The proposed structures should be identified and considered in an environmental review by others. A completed request for environmental comments form is enclosed.

This letter is an assessment based on the regional geologic conditions available at the KGS at the time of writing and cannot be used in substitute of a detailed site characterization. Other geologic conditions, not discussed herein, or for which the KGS has no knowledge, may affect the viability or safe operation of this facility or property. It is the responsibility of the applicant to provide any necessary characterization, geotechnical or environmental testing, or design by a licensed professional geologist or engineer to complete the project.

Sincerely,

Shane Lyle, RG
Geology Extension Coordinator
