June 21, 2007

Dear Mr. Boettcher,

Based on the limited information provided to me I do not foresee any problems with the Eureka sewer main replacement project proceeding as planned.

Sincerely,

RE: Environmental Review – Eureka, KS – Wastewater Treatment & Sanitary Sewer
Main Improvements

Dr. Harrison:

A previous letter dated June, 2005 requesting an environmental review was sent with a response of approval or no comment from your agency, however the City's project budget will allow for additional sanitary sewer main replacements and we felt it prudent to solicit additional review comments to the expanded project. The sanitary sewer collection mains due for reconstruction are all located within City right-of-way and/or easements. A map of the proposed sanitary sewer main replacements is enclosed. At this time I request to expedite the review of the project in order to maintain the construction schedule. A response would be appreciated by June 8th, 2007.

Please submit your response to BG Consultants, 2508 W. 15th Avenue, Emporia, KS 66801.

If you have questions please call me at 620-343-7842.

Sincerely,

Bruce Boettcher, P.E.
