RE: City of St. Paul, Kansas Rehabilitation of Residential Structures
Grant HR07-0095

Dear Ms. Vorohies:

The Kansas Geological Survey (KGS) has received your request asking us to review the above referenced project. In general, the project involves the rehabilitation of six residential structures in St. Paul, Kansas.

A review of regional geologic information and project information provided by you indicates that there are no unduly adverse geologic conditions that should affect this project. Site-specific conditions should be considered prior to construction.

This letter is an assessment based on the regional geologic conditions available at the KGS and cannot be used in substitute of a detailed site characterization. Other geologic conditions, not discussed herein, or for which the KGS has no knowledge, may affect the viability of the project. It is the responsibility of the applicant to provide any necessary characterization, geotechnical or environmental testing, or design by a licensed professional geologist or engineer to complete the project.

If you have any questions please feel free to contact me at (785) 864-2099.

Sincerely,

Robert S. Sawin
Geologist
