Dear Mr. Shetlar:

I have reviewed the information provided to me concerning the City of Greeley improvements to the sanitary sewer system. Based on the information provided to me the project looks sound and should be approved.

The above comments are based on regional geologic conditions and limited information available to the KGS at the time of writing and cannot be used in substitute for a detailed site characterization. Other geologic conditions, not discussed here, or for which the KGS has no knowledge, may affect the viability or safe operation of this facility or property. Geotechnical engineering and design are outside the purview of the KGS. It is the responsibility of the applicant to produce any detailed site characterizations, geotechnical or environmental testing, or design by a licensed professional geologist or engineer to complete the project.

Sincerely,

A handwritten signature in cursive script that reads 'margaret A. Townsend'.

Re: City of Greeley, Kansas
Intergovernmental Review

Dear Dr. Allison:

The City of Greeley, Kansas has made application for revolving loan funding through Kansas Department of Health & Environment.

The project involves sewer system rehabilitation of the existing sewer lines and manholes, replacement of one lift station and replacement of the concrete influent structure at the existing lagoon treatment site. All work will be in existing right-of-ways that have been previously disturbed during the original installation of the sewer system.

Please provide any review comments or clearance to this office by September 1, 2008.

Sincerely,
Shafer, Kline & Warren, Inc.

Kenneth R. Shetlar, P.E.
