Mr. John P. Cashatt, PE
Schwab-Eaton
PO Box 280
Beloit, KS 67420

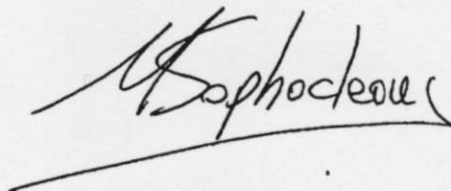

Dear Mr. Cashatt,

RE: Mitchell Co. waste tire monofil expansion in the NE quarter of S36, T6S, R8W.

Following an examination of the Kansas Geological Survey (KGS) Bulletin (no. 140) on Mitchell County, the Mitchell County Soil Survey report, and the USGS topographic map of the area, the KGS is not aware of any potential problems with the proposed site as long as all pertinent KDHE rules and regulations/precautions are followed. Please let me know if you need anything further.

The above comments are based on regional geologic conditions and limited information available to the KGS at the time of writing and cannot be used in substitute for a detailed site characterization. Other geologic conditions, not discussed here, or for which the KGS has no knowledge, may affect the viability or safe operation of this facility or property. Geotechnical engineering and design are outside the purview of the KGS. It is the responsibility of the applicant to produce any detailed site characterizations, geotechnical or environmental testing, or design by a licensed professional geologist or engineer to complete the project.

Sincerely,

Marios Sophocleous
Senior Scientist

Mitchell County, Kansas proposes to expand their operation of a waste tire monofil in the Northeast Quarter of Section 36, Township 6 South, Range 8 West. This site is immediately west of the current CD Landfill operation. Proposed work consists of excavating a trench in which to dispose of the waste tires. Earth from the excavation will be used to construct berms along side the trench. The dimensions of the disposal cell will be approximately 150' x 270' x 12'. Approximately 1 acre of native pasture will be disturbed. All disturbed soil will be seeded. As per KAR 28-29-302, your agency is to be notified. Please respond within 30 days to the following address if you have comments. An area map and a plan sheet of the project site are enclosed.
