Re: Community Memorial Healthcare Inc., Guaranteed Community Facility – Marysville,
Kansas

Dear Mr. McCann,

The Kansas Geological Survey (KGS) has received your November 21, 2008 letter requesting us to review the above referenced project. The project consists of renovation and construction to the business property, located at 708 N 18th St., Marysville, Kansas. The project will comply with appropriate State laws concerning the application.

A review of regional geologic information and project information provided by you indicates that there are no unduly adverse geologic conditions that should affect this project. However, the USDA Soil Survey of Marshall County indicates that the soils underlying the site may have a severe shrink-swell potential and low strength. These characteristics should be considered, especially for any foundation design. A completed environmental review form is enclosed.

This letter is an assessment based on information about the regional geologic conditions available via the KGS and cannot be used in substitute of a detailed site characterization. Other geologic conditions, not discussed herein, or for which the KGS has no knowledge, may affect the viability of the project. It is the responsibility of the applicant to provide any necessary characterization, geotechnical or environmental testing, or design by a licensed professional geologist or engineer to complete the project.

Sincerely,

David P. Young,
Hydrologist
