

### **Explanation for Plate 3.**

**Plate 3**--Thin sections showing attrital coal. **A**, Banded translucent attritus. Wide band near center is classified as anthraxylon on basis of size (Mineral coal, X 125). **B**, Translucent attritus composed of shredlike fragments. Opaque bodies are pyrite (Mineral coal, X 125). **C**, Opaque attritus intercalated with bands of anthraxylon and translucent attritus (Bevier coal, X 95).

Petrographic Study of Southeastern Kansas Coals, by William W. Hambleton
