This map is a preliminary surface geologic map for the Whitewater Quadrangle, Kansas. It has been compiled from State of Kansas, Kansas Geological Survey Water Resources Investigations Report 88-4225, 119 p. and its purpose is to provide a preliminary assessment of the geology of the area. The map is intended to be used for general planning and resource management purposes and does not represent detailed and accurate geologic maps. The data used for this map includes topographic data, satellite imagery, and other geologic datasets. The map is subject to change and may not represent the most current geologic information. This map is not suitable for navigation.
