OCC

1. Notice the appropriate district office prior to starting of well.
2. A copy of the approved notice of intent to drill shall be posted on each drilling rig.
3. The minimum height of the surface pipe as specified below shall be set by grouting cement to the top. In all cases surface pipe shall be set through unremodeled manholes at a minimum of 20 feet into the underlying formation.
4. If this well is dry, an agreement between the operator and the district office on plug length and placement is necessary prior to plugging.
5. The appropriate district office will notify the well is either plugged or production casing is cemented in.
6. If an ALTERNATE II COMPLETION, production pipe shall be cemented from below any usable water to surface within 120 days of spud date. (Refer to Appendix C of Kansas Surface casing order #8956871L, when drilled to the KCC District 3 area, alternate II cementing must be completed within 30 days of the spud date or the well shall be plugged.)

In all cases, NOTIFY the district office prior to any cementing.

I hereby certify that the statements made herein are true and to the best of my knowledge and belief.
