Overflush, Deviated or horizontal wellbore?

Yes

If Yes, true vertical depth:

NA

Bottom Hole Location:

KCC Dik 56

AFFECTED

The undersigned hereby affirms that the drilling, completion and eventual plugging of this well will comply with K.S.A. 56 et seq.

It is agreed that the following minimum requirements will be met:

1. Notify the appropriate district office prior to spudding of well.
2. A copy of the approved notice of intent to drill shall be posted on each drilling rig.
3. The minimum amount of surfacerine as specified below shall be set by encircling concrete to the top. In all cases surfacerines shall be set through all consolidated materials plus a minimum of 20 feet into the underlying formation.
4. If the well is dry hole, an agreement between the operator and the district office on plug length and placement is necessary prior to plugging.
5. The appropriate district which will be notified when well is either plugged or in production casing is removed.
6. If an ALTERNATE I COMPLETION, production shall be commenced from below any undrilled water to surface within 120 days of spudding.
7. Or commences at Appx. 18", Eastern Kansas surface casing string 140,000 ft. C, which applies to the KCC Dik 3 area, otherwise no cementing must be completed within 30 days of the dated date or the well shall be plugged.

I hereby certify that the statements made hereon are true and is the best of my knowledge and belief.

Date: 11/27/05
