Kansas Geological Survey - Geohydrology Section
Interactive Atlas

Navigation:

Pan: To move the map click and drag with your mouse.

Zoom: a. Use the + or – buttons in the upper left corner 9 of the map.

b. Use the scroll wheel on your mouse to zoom in and out.

Identify:

Click on topmost feature that is not a color gradient to view more information.

(Note: Identification of values for specific locations from color gradient layers is not possible; gradient information is intended only as a guide, not exact values.)

1 Click “Legend” to show the legend and click the X to close the legend.

2 To print the map space click “Print” *(Note: for better results take a screen shot).*

3 To change the visible layers click the “Layers” dropdown menu and select the desired layers.

(Note: View only one color gradient layer at a time; for brighter colors on the gradient, turn off the “HPA Extent” layer.)

4 To change the base map layer click the “Basemap” dropdown menu.

5 Click Measure to measure area, distance or to identify coordinates.

(Note: Double click to complete area or line segment .)

6 Zoom to pre-defined view extents.

7 Click Share to tweet, facebook or email people to share this map.

8 Type an address or city to zoom to that location.
