

Kansas Geological Survey - Wichita Sample Preservation Activities 2019

- ❖ Petroleum companies provided the Survey with geologic samples from 652 oil and gas wells.
- ❖ Samples from 640 wells were preserved at an average rate of nearly 1,067 sample feet per hour for a total of 699 processing hours.
- ❖ 104,000 sample envelopes and 2,871 sample boxes were used to preserve and restore well samples.
- ❖ Samples from 14 wells were not geologically significant to the oil or gas operator and the sample collection and were discarded.
- ❖ Staff preserved 0.677 million sample feet, the equivalent to the flight distance from Wichita, Kansas to Topeka, Kansas.
- ❖ Funded 2,445 hours to restore samples for 4,750 wells and resolved 26,292 sample preservation issues, including the recovery of missing samples for 725 wells.
