INTRODUCTION

The Kansas Geological Survey annually compiles and publishes this report, Oil and Gas Production in Kansas. The 1979 oil production data are presented in Table 1 and the gas production data in Table 2. Both oil and gas production figures are presented alphabetically by county and field.

Table A presents comparisons, by county, between oil production and number of oil wells in 1978 and 1979. Table B compares 1978 and 1979 gas production and number of gas wells, also by county. Figure 1 is a graphic presentation of the reported annual oil and gas production for the past 10 years. Figures 2 and 3 are state maps showing oil and gas production for each producing county.

SUMMARY

The 1979 reported crude-oil production in Kansas declined 0.9 percent from the 1978 reported production. Oil production during 1979 was 56.1 million barrels, compared with 56.6 million barrels reported in 1978. A total of 47,372 oil wells was reported in 1979, compared with 46,366 reported in 1978. The average rate of oil production declined from 3.3 barrels of oil per day per well in 1978 to 3.2 in 1979.

Of the 89 oil-producing counties in Kansas, only 30 reported production increases, while 56 reported production declines, and three reported no appreciable change. Ness County reported the largest production decrease--166,000 barrels for 1979--compared with 2,404,000 barrels reported in 1978. Clark County reported the State's largest production increase, 477,000 barrels. Ellis County reported the largest volume of production for 1979--4,693,000 barrels--an increase of 66,000 barrels over 1978.

The reported gas production in Kansas during 1979 declined by 6.0 percent, from 852.4 billion cubic feet in 1978 to 804.2 billion cubic feet in 1979. Gas production was reported from 48 counties with Stevens County reporting the highest volume, 182.1 billion cubic feet.

TREATMENT OF DATA

Because oil production records for individual fields were not kept for many eastern counties prior to 1944, cumulative oil production of many fields cannot be determined. The oil production data for these fields have been cumulated since 1944 and are marked with an asterisk in Table 1.

An asterisk after the cumulative gas production figure in Table 2 indicates that a correction has been made in the past year's production and is reflected in the current year's cumulative figure.

Because early gas production was not reported for many old gas fields in several counties, cumulative production from these counties cannot be determined. Therefore, Table 2 does not show cumulative totals for several counties. Previously the unreported gas was estimated and reported in Table 2 as miscellaneous county production. Beginning in 1979, this practice has been discontinued and only reported gas production is shown in the table.

Where a field extends across county lines, the production was computed for individual leases to assure the production was assigned to the proper county.

Most of the data presented in Table 1 and 2 are self-explanatory; however,

clarification is offered for several headings. Area is defined as only the productive area in the field outline, as defined by the Nomenclature Committee of the Kansas Geological Society. The thickness of the producing zone is an average of the known producing intervals in the producing zone. Depth to the producing zone is the depth at which the discovery well penetrated the top of the producing zone.

ACKNOWLEDGMENTS

The facilities of the Academic Computer Center of The University of Kansas were used to compile and produce this report. Oil and gas production data were obtained from the Petroleum Information Corporation and the Oil and Gas Conservation Division of the State Corporation Commission of Kansas.

Appreciation is expressed to the Nomenclature Committee of the Kansas Geological Society for supplying data on oil and gas pools discovered during the year and for areal description of existing fields.

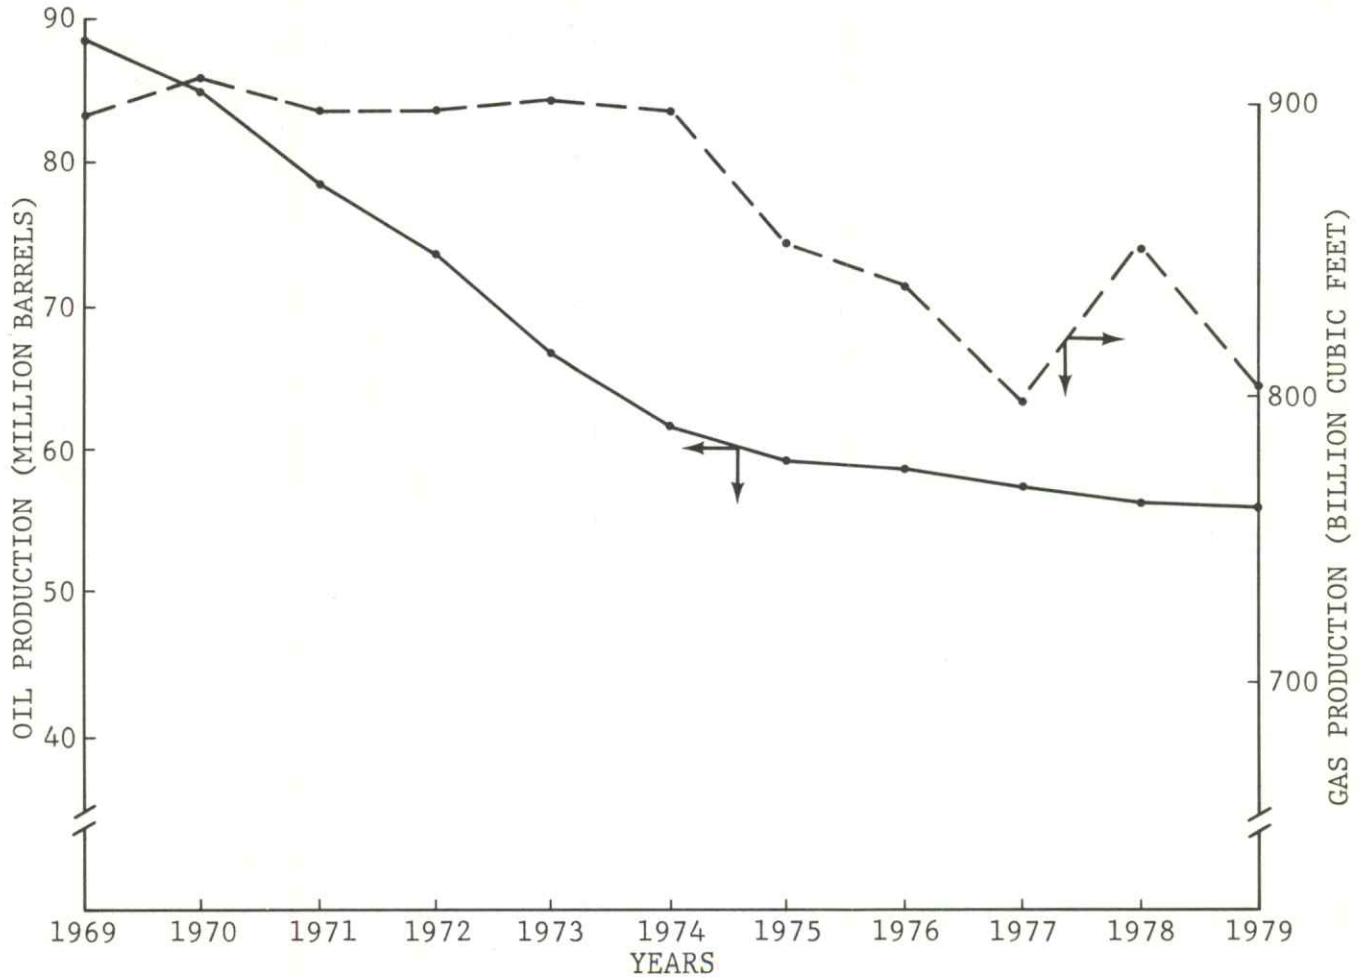

Figure 1. Kansas 10-year oil and gas production history.

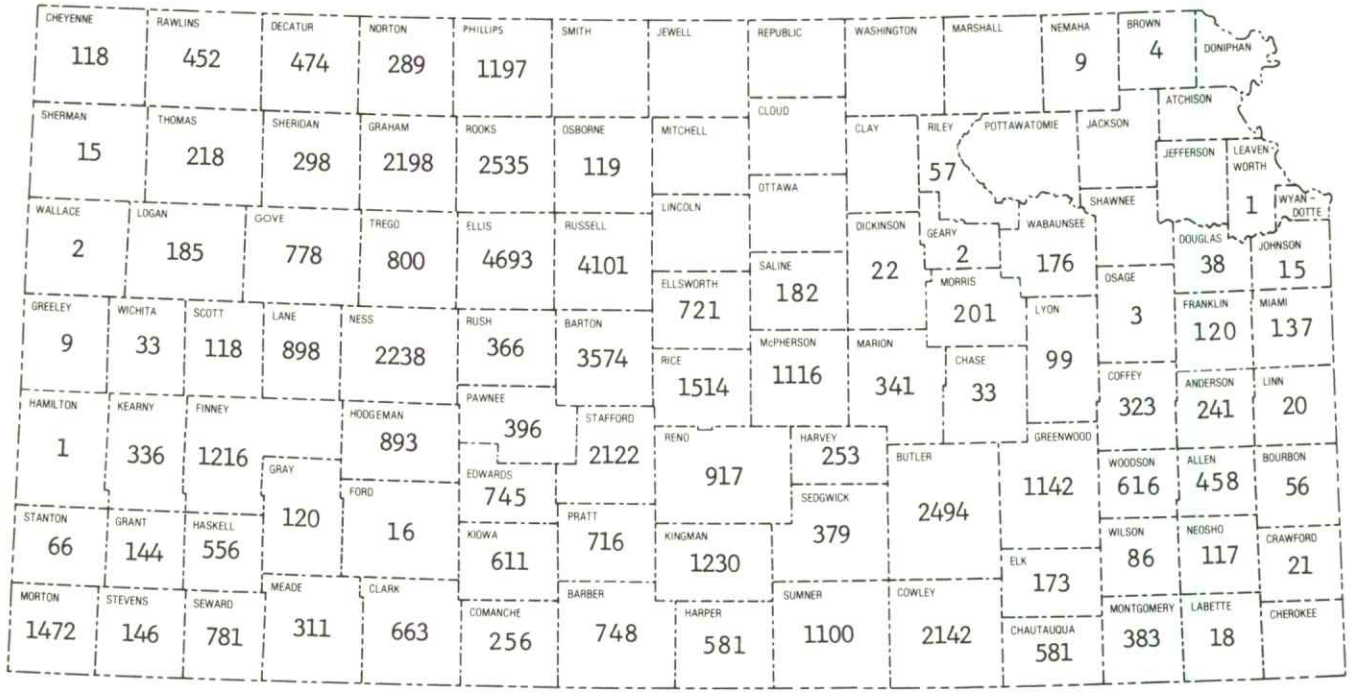

Figure 2. Kansas 1979 oil production by county (in 1000 barrels).

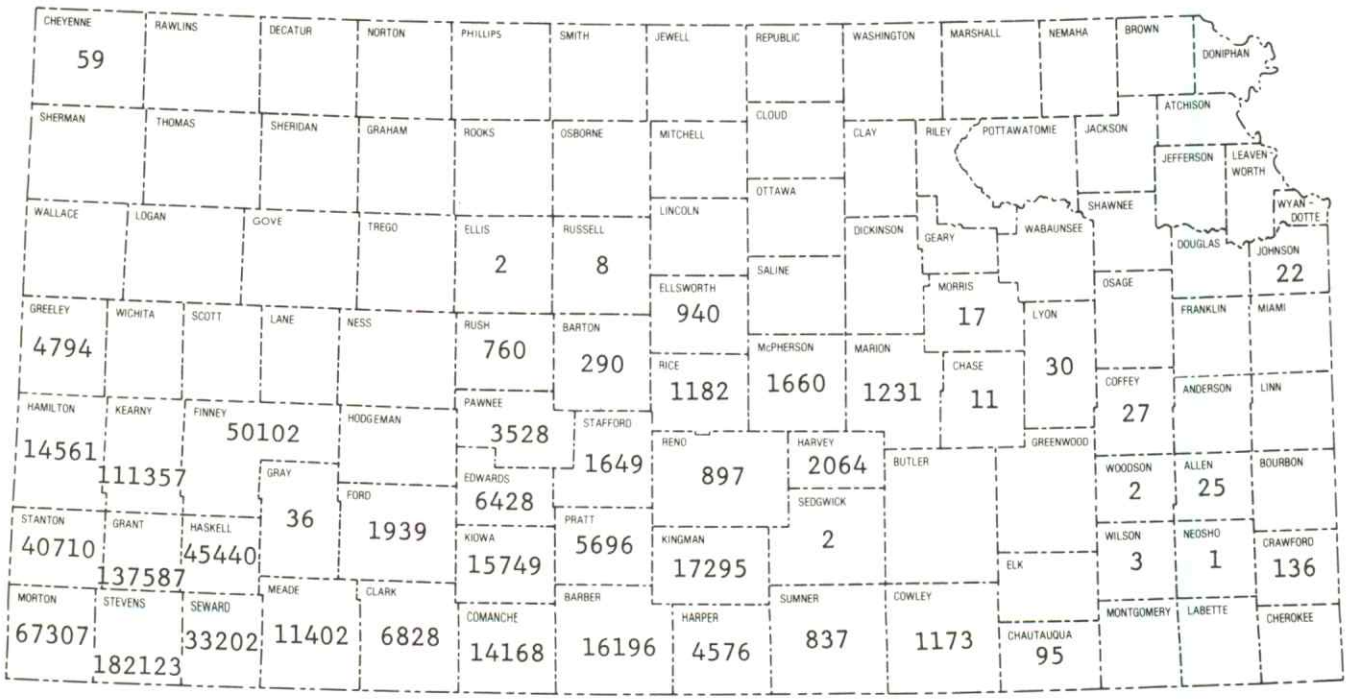

Figure 3. Kansas 1979 gas production by county (in million cubic feet).
