Introduction

The 1998 Directory of Kansas Industrial Mineral Producers was compiled using records from the Kansas Geological Survey and the Kansas Conservation Commission as of June 1998. It is arranged by county, then commodity, and individual producers of each commodity. Individual entries include the company name, address and phone number, the type of operation, and the legal description for each operation.

Included are known active leases for pits, quarries, and mines that produce limestone, dolomite, sandstone, gypsum, salt, sand and gravel, clay and shale, and volcanic ash. Also included are the locations of active sand and gravel dredges on the Kansas River as of October 1997, and companies that solution mine the underground salt in Reno, Rice, and Sedgwick counties.

Acknowledgment

The authors express their appreciation to Dana Adkins-Heljeson, staff member at the Kansas Geological Survey, for arranging this report in its final computerized form.
