Introduction

The 1999 Directory of Kansas Industrial Mineral Producers was compiled using records from the Kansas Geological Survey and the Kansas Conservation Commission as of October 1999. It is arranged by county, then commodity, and individual producers of each commodity. Individual entries include the company name, address and phone number, the type of operation, and the legal description for each operation.

Included are known active leases for pits, quarries, and mines that produce limestone, dolomite, sandstone, gypsum, salt, sand and gravel, clay and shale, and volcanic ash. Also included are the locations of active sand and gravel dredges on the Kansas River, and companies that solution mine the underground salt in Reno, Rice, and Sedgwick counties.

Acknowledgment

The authors express their appreciation to Dana Adkins-Heljeson and Kurt Look, staff members at the Kansas Geological Survey, for arranging this report in its final computerized form.
