The 2023 water-level data were published on the Web and not in paper form. Both the current year's measurements and historical water-level data are archived and maintained on the KGS website in the WIZARD database at www.kgs.ku.edu/Magellan/WaterLevels/index.html. The township-range-section identifier and the depth to water for each well measured in 2023 are provided in tabular form as part of this report and can be found online under the heading "2023 Reports" at www.kgs.ku.edu/Hydro/Levels/index.html.

2023 Water-Level Data Acquisition Statistics

Summary

The Kansas Geological Survey (KGS) and the Division of Water Resources (DWR), Kansas Department of Agriculture, successfully completed the field-measurement phase of the 2023 annual cooperative water-level measurement program prior to March 1, 2023. The annual program is designed to regionally sample the High Plains aquifer in Kansas so trends can be established and evaluated for effective incorporation into water-resource management strategies. The KGS measured 578 wells and the three DWR offices (Garden City, Stafford, and Stockton) measured 828 wells, for a total of 1,406 network wells in 2023.

No wells were noted as needing replacement in 2023. Yearly geostatistical studies will define undersampled areas in future years and assist in selecting optimum locations for replacement wells to eliminate holes in the hexagonal network used to assure uniform sampling of the aquifer.

DWR statistics are not available for the 2023 water level data acquisition.

January 2023 Acquisition	KGS	DWR	Total

Appendices

The two appendices to this report are summary tables.

Appendix A Contains a summary of information for all wells measured by the KGS. This appendix includes county, well legal description (ID), and 2023 depth of water below ground surface (BGS). Quality Assurance measurements (QA), Provisional wells (PROV), No Measurement Taken (NMT), and Unable to Measure (UTM) are also identified.

Appendix B Contains a summary of information for all wells measured by the DWR. This appendix includes county, well legal description (ID), and 2023 depth of water below ground surface (BGS). Provisional wells (PROV), No Measurement Taken (NMT), and Unable to Measure (UTM) are also identified.

Both the current year's measurements and historical water-level data are archived and maintained at the KGS in a centralized database (WIZARD) that can be accessed at the KGS website at www.kgs.ku.edu/Magellan/WaterLevels/index.html. The township-range-section identifier and the water level for each well measured are also provided in tabular form as part of this report, which can be found online at www.kgs.ku.edu/Hydro/Levels/index.html under the heading "2023 Reports."
